DETAILED ACTION

The supplemental amendment filed on paper No. 17 following the previous election filed on paper No. 16 is acknowledged. Since the previous restriction is not properly done, further restriction based on the previous election filed on paper No. 16 is required.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- a) The compound consists of amino acid sequences SEQ ID NO 1.
- b) The compound consists of amino acid sequences SEQ ID NO 2.
- c) The compound consists of amino acid sequences SEQ ID NO 3.
- d) The compound consists of amino acid sequences SEQ ID NO 4.
- e) The compound consists of amino acid sequences SEQ ID NO 5.
- f) The compound consists of amino acid sequences SEQ ID NO 6.
- g) The compound consists of amino acid sequences SEQ ID NO 7.
- h) The compound consists of amino acid sequences SEQ ID NO 8.
- i) The compound consists of amino acid sequences SEQ ID NO 9.
- j) The compound consists of amino acid sequences SEQ ID NO 10.
- k) The compound consists of amino acid sequences SEQ ID NO 11.
- l) The compound consists of amino acid sequences SEQ ID NO 12.
- m) The compound consists of amino acid sequences SEQ ID NO 13.
- n) The compound consists of amino acid sequences SEQ ID NO 14.
- q) The compound consists of amino acid sequences SEQ ID NO 15.
- r) The compound consists of amino acid sequences SEQ ID NO 16.

Art Unit: 1648

s) The compound consists of amino acid sequences SEQ ID NO 17.

t) The compound consists of amino acid sequences SEQ ID NO 18.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

All of the species are of the numeral order of variable peptide sequences.

The following claim(s) are generic: 1-15 and 19-20, 22, 24 and 26

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The species of peptides selected are only distinctly related. They have different molecular structure in length or in amino acid. They share some sequence homology, express different protein peptide, and produce different biological significance.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
